Transport, Regional Development,  
Communications and the Arts**

# About us...

- 1. Australian Government initiative** run by the National Farmers' Federation. **National remit** - rural, regional and remote Australia.
- 2. FREE** and **INDEPENDENT** service available to all individuals, community groups, organisations, businesses and **councils**.
- 3. We assist with –**
  - ✓ Identifying all connectivity options at any site in Australia – new builds, existing builds, extending range etc
  - ✓ Attend community events and support 1:1 on issues and options
  - ✓ Work with councils and other groups to build connectivity plans
  - ✓ Help troubleshoot problems with connections
  - ✓ Assist with the escalation of reported incidents with RSPs.
  - ✓ Help people evaluate suitable plans (data, speeds, latency, budget)

## WHAT WE DO

Provide free, independent advice and support for rural, regional and remote individuals, businesses and communities on internet and voice options.

## WHO WE ARE

Australian Government initiative run by the National Farmers' Federation.  
Regionally-based team located around Australia.

## HOW WE HELP

Free advice on getting connected, improving a connection, switching to a better or cheaper service, or finding out how to boost or get better internet and mobile coverage.

## OUR SERVICES

Individualised connectivity reports  
Escalations service  
Online Connectivity Resource Hub  
Attend community events  
Book-in service to discuss issues

# How the RTH was formed

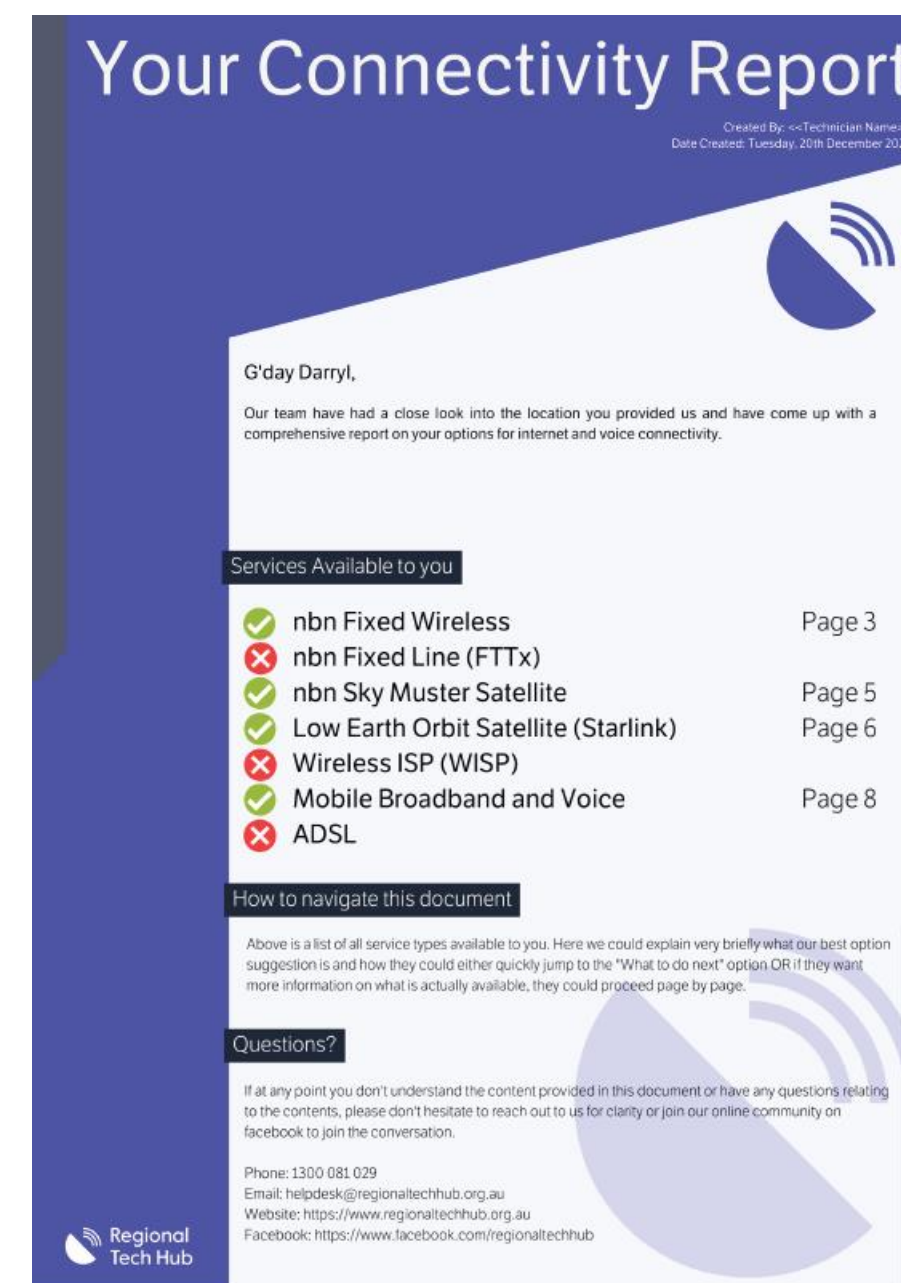

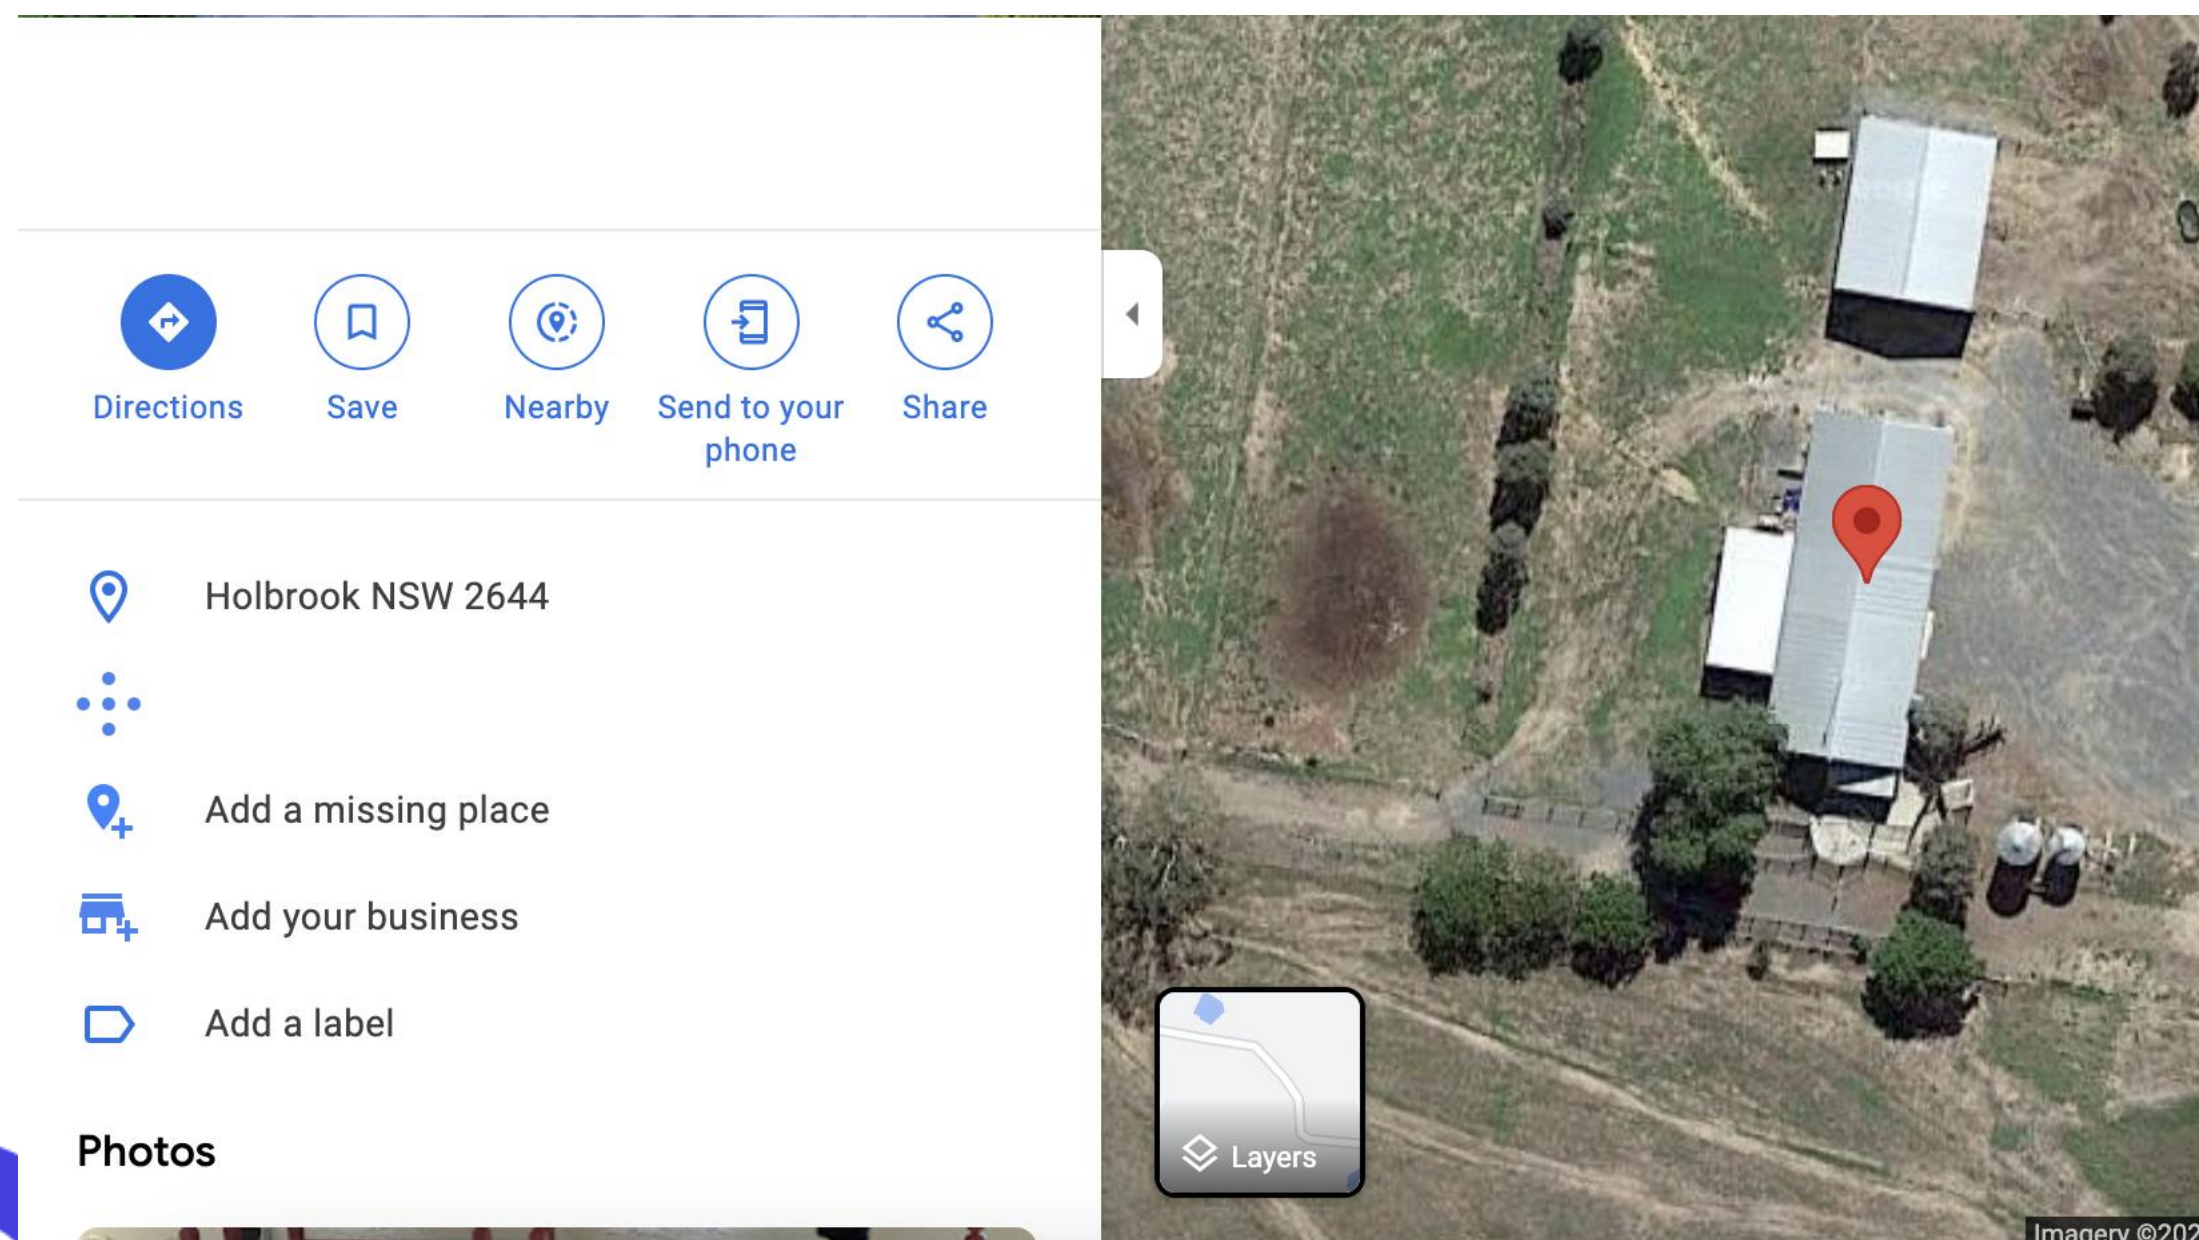

**RTH has helped 140,000 people across rural, regional and remote Australia**

# Personalised connectivity reports

- Finding available technology solutions via a free, independent, personalised connectivity report – for voice and internet.
- Seven regionally-based staff around Australia to help explain people and business technology options.

Hi Trent,

The Regional Tech Hub has completed a Connectivity Report for your address, 40 Young St, Holbrook NSW 2644. Please find the Connectivity Report attached as a PDF to this email.

Based upon our checks, you are currently eligible for:

1. **nbn™ Fibre To The Node**  
Your address is listed as being ready to connect to nbn™ Fibre To The Node technology.

Everything you need to know about fixed line technologies (including FTTP) is available on our website: <https://regionaltechhub.org.au/get-connected/discover-internet-options/nbn-fixed-line/>

For your property to be connected to FTTP, you will need to sign up with a Retail Service Provider so that an appointment can be made to have your property connected to the nearest node in the street.

If the property has not had an existing phone line installed at the address, you may require a new phone line to be installed from the house to the street and that would attract a new service charge to have the initial wiring completed. Speak with your Retail Service Provider if you need this to be completed.

You might like some more information on how to Choose an nbn™ Provider, which you can find on our website: <https://regionaltechhub.org.au/get-connected/find-a-connection/>

#### Tenants

- If you are renting a home, you should agree with your landlord on the best location for any interior nbn™ equipment. You should then contact a telco to buy to an nbn™ plan.
- If you have any issues with your landlord, you can talk to your local tenant's association. <https://www.acma.gov.au/get-connected-nbn>
- Telstra and Optus also have guides for tenants : <https://exchange.telstra.com.au/renters-guide-getting-nbn-connected>
- <https://www.optus.com.au/broadband-nbn/nbn/nbn-articles/can-i-connect-to-the-nbn-if-im-renting>

2. **nbn™ Fixed Wireless**  
You are currently mapped for nbn FTTP.

3. **Mobile Broadband**  
We also checked the mobile coverage in your area, and you can get mobile coverage from Telstra 5G, Optus 4G and Vodafone 4G.

To test whether you have coverage from a particular provider, especially in a marginal area, consider buying a \$2 SIM and testing with your mobile phone at your place. SIMs are available from most major retailers stores and some service stations and Australia Post.

# Help with a Retail Service Provider

- Help resolve problems with your phone or internet provider and work with you to rectify any connection issues.
- Help make sense of what is going on and give you confidence and the language to use.
- Walk you through any trouble shooting processes.
- Our completely free and independent service is here to help find you a solution!

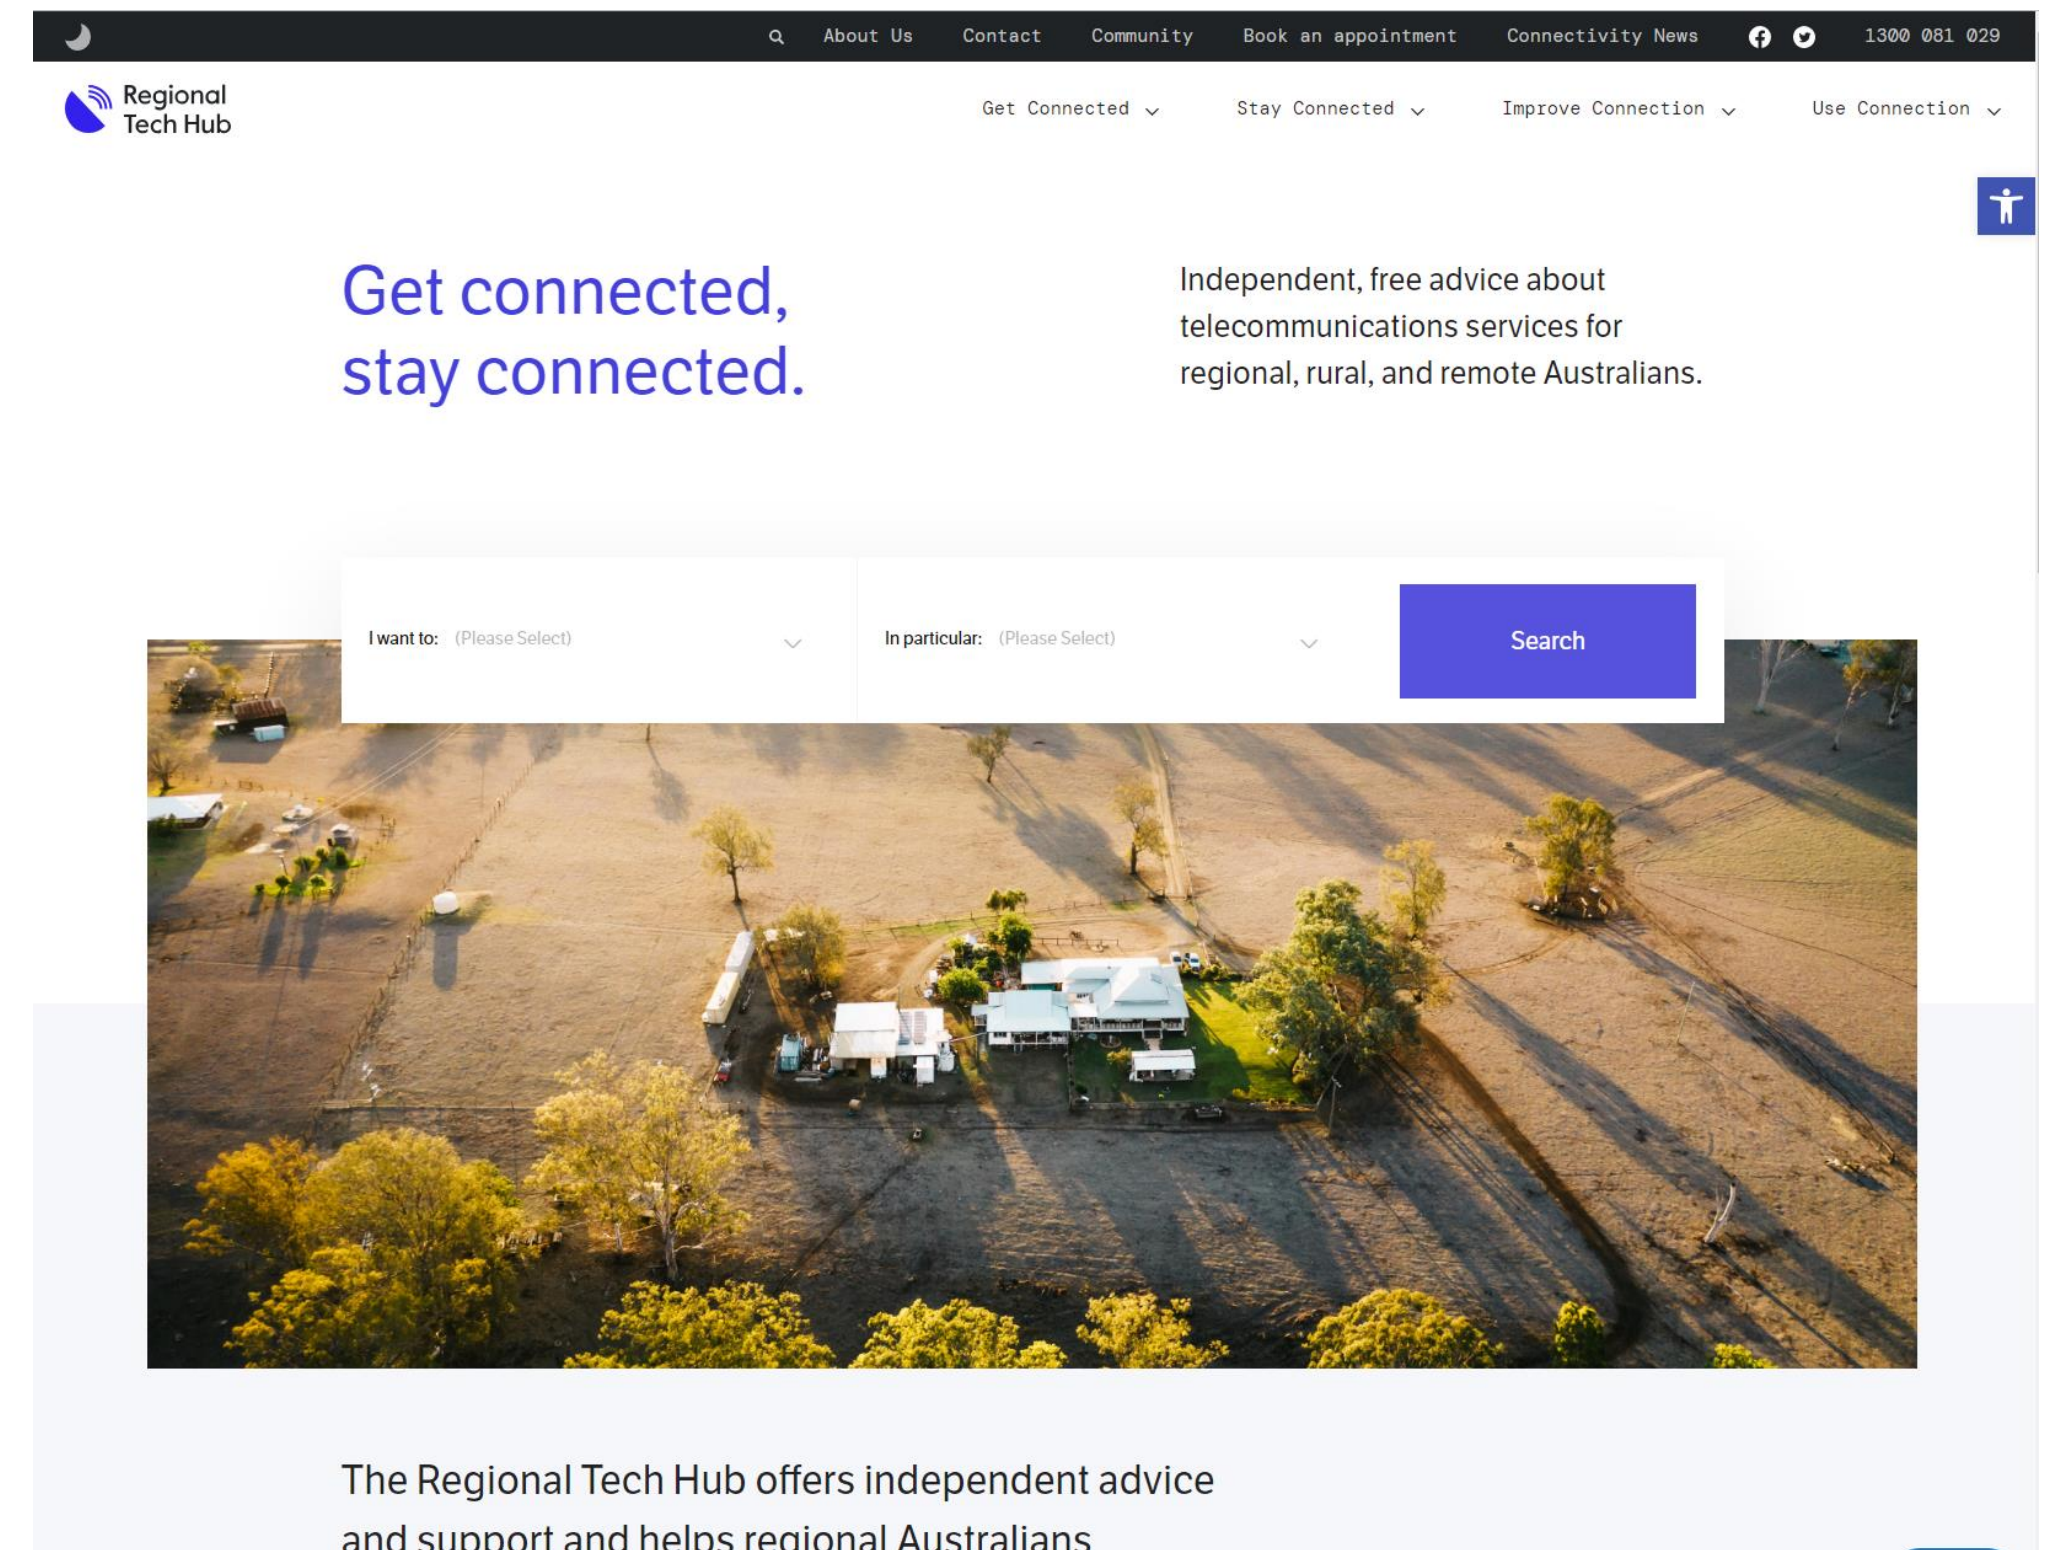

# Connectivity Resource Hub

Example resources:

- **Small business**, e.g. POS, 3G shutdown
- **Emergency and disaster preparedness**
- Health and education
- Home internet and voice (get connected and stay connected)
- Wifi calling
- On-farm connectivity
- **New build advice, rentals and technology placement**
- Extending range and coverage

The screenshot shows the homepage of the Regional Tech Hub website. At the top, there is a navigation bar with links for 'About Us', 'Contact', 'Community', 'Book an appointment', 'Connectivity News', and a phone number '1300 081 029'. Below the navigation bar, the 'Regional Tech Hub' logo is on the left, and a menu with 'Get Connected', 'Stay Connected', 'Improve Connection', and 'Use Connection' is on the right. The main content area features the headline 'Get connected, stay connected.' and a sub-headline 'Independent, free advice about telecommunications services for regional, rural, and remote Australians.' Below this is a search bar with two dropdown menus labeled 'I want to: (Please Select)' and 'In particular: (Please Select)', and a 'Search' button. The background of the search bar area is an aerial photograph of a rural farmstead with several buildings and trees. At the bottom of the page, a text box states: 'The Regional Tech Hub offers independent advice and support and helps regional Australians'.
